

# REPEATING COURSES

---

A student may repeat a course in which a D or F grade has been earned. A computable grade (excluding I, W, AU, CR, S or U) in a repeated course may be submitted in the calculation of the grade point average, though the original grade also remains on the transcript. The first occurrence with a C- or better grade will count in earned/passed hours. Future attempts will not count in attempted/earned hours.

Repeated courses count as attempted hours each time a student registers for them. Also, each course is counted in the student's financial aid GPA requirement.

Neither credits nor grade points may be earned by repeating a course for which a grade of C or higher has already been received. Repeat options applies only to eligible courses that were completed prior to the time a student was awarded a degree at SENMC.
